

*Would you like to be able to auto fill the lens selection side with one click of a button? If your answer is yes, you will love this feature!*

***What it does:***

You can create different packages (example Silver SV Package to include a specific type of AR, Poly or Trivex) and it will automatically put them into an optical order.

***How to set it up:***

1. Go to Admin
2. Defaults
3. Frame page defaults
4. Click on packages tab
5. Add a value (example: Silver SV package)
6. Edit that value - Edit item
7. Apply all the lens options that go with this package from the drop downs.
8. Save

***How to use it:***

1. Go create a new order
2. Click on packages and choose the package
