Example 1

| CHIEF C | OMPLAINT - Previous | | | | | Igr | nore this record for Meaningful Use | |
|----------|---------------------|----------|----------|-----------|-------|------------|-------------------------------------|--------|
| Primary | dry eyes | | | | | | | ^ |
| | | | | | | | | \sim |
| Location | Both eyes | Severity | | Quality | worse | Duration | ongoing | |
| Timing | PM | Context | computer | Modifying | | Associated | blurred vision | |

Option 1: Label will show regardless if the field has a value

CC/HPI dry eyes Quality: Location: Both eyes Severity: Duration: ongoing worse blurred Timing: ΡM Context: Modifying: Associated: computer vision Option 2: Label will show only if the field has a value CC/HPI dry eyes Location: Both eyes Quality: worse Duration: ongoing Timing: PM Context: computer Associated: blurred vision

Example 2:

| CHIEF C | OMPLAINT | | | Igr | nore this record for Meaningful Use | |
|-----------|----------|----------|-----------|------------|-------------------------------------|---|
| Primary | dry eyes | | | | | ^ |
| | | | | | | ~ |
| Location | | Severity | Quality | Duration | | |
| Timing | | Context | Modifying | Associated | | |
| Secondany | | | - | _ | | |

Option 1: Label will show regardless if the field has a value

CC/HPI dry eyes

Location: Timing: Severity: Context: Quality: Modifying: Duration: Associated:

Option 2: Label will show only if the field has a value

CC/HPI dry eyes

How to set up labels as shown in option 2

I'm going to use Glaucoma in the family ocular history as the example:

| FAMILY OCULAR HIST | ORY All Else Normal |
|--------------------|---------------------|
| Glaucoma | Маси |

Here is the FID for Glaucoma in my records:

| FAMILY OCULAR HISTORY (221) [-9 | lse Normal |
|------------------------------------|------------|
| Glaucoma (<mark>230) (216)</mark> | Маси |

The first thing to do is to insert the merge fields onto the document:

FAMILY OCULAR HISTORY

«MC_216»

Next, right click on the merge field and choose Edit Field...

Check of Text to be inserted before: (or after, if applicable)

Enter what you would like to appear before (or after) your text. Don't forget a space after the : or the last character you enter.

Also, check off Preserve formatting during updates and then click OK

Now, you will see your label before the merge field:

Glaucoma: «MC_216»

We can tell that Glaucoma: is part of the merge field because if we click on it, it's all one unit:

Glaucoma: «MC_216»

You can bold the label if you want:

Glaucoma: «MC_216»

Steps are complete! You can do as many or as few fields like this as you want $\ensuremath{\textcircled{}}$
