

PREMIER E Y E • C E N T E R

Your eyesight is priceless and at Premier Eye Center it's our goal to protect it!

Premier Eye Center is committed to protecting and preserving your eye health with the most advanced technology. We are excited to offer testing that can diagnose, monitor, and manage common diseases like glaucoma, macular degeneration and diabetic retinopathy. At Premier Eye Center locations we offer an **iWellness Exam** or a **Zeiss Matrix Visual Field**.

Both of these testing methods are quick, noninvasive and deliver a scan to the doctor that allows to see beneath the surface of your retina and behind the eye pathways. Traditional eye exams and retinal photography do not provide this level of detail.

Please indicate if you would like to receive this additional testing

- Our technicians will perform either an iWellness Exam or Zeiss Matrix VF depending on age and family history. This will be performed during your pre-screening and the doctor will review with you today. **The \$59 charge is not typically covered by vision or medical insurances, so this will be added into the cost of your visit today.**
- Yes I elect to have this testing performed as indicated by my doctor _____
- No, I decline additional testing and understand the risks _____
